TOTAL PRODUCTION CONTROL

Take commanding, tactile control of your favorite music software with the QX49. Punch out drumbeats on great-feeling pads, control effects using smooth, tight knobs, and drive your sequencer using dedicated transport control. The QX49's immense parameter control and velocity-sensitive keyboard will get your hands off of the mouse and into the action for a more visceral music-making experience.

Light and portable, the QX49 is perfect for performing with both software and hardware instruments in the studio or on stage. The QX49's extensive layout of eight sliders, eight rotary knobs, four backlit drum pads, and dedicated transport controls will ensure the appropriate feel and response of virtually all your software's parameters. Both USB-MIDI and traditional MIDI jacks are included for easy connection to Mac, PC and MIDI hardware, and the QX49 comes with a copy of Ableton Live Lite Alesis Edition software for performing, recording, and sequencing music right out of the box. Take full control of the music making process with the QX49.
