

## DM10

### HIGH DEFINITION DRUM MODULE WITH DYNAMIC ARTICULATION™

**REAL SOUNDS AND UNLIMITED EXPANSION.** The DM10 is the drum module you've been waiting for. Not only does it deliver lightning-fast, ultra-accurate tracking, the widest dynamic range of any drum module, incredibly drummer-friendly operation, a massive input section, but it also has the most realistic, natural sound set available in any drum module. But that wasn't enough for us. Of course the DM10 has a built-in sequencer, metronome, top-panel mixer, and a variety of outputs, but the DM10 is also the first drum module to enable you to update its sound set via standard USB connection with your Mac or PC.

## FEATURES

- › 12 trigger inputs
- › Top-panel mixer for balancing drums, cymbals, and accompaniment levels
- › Compatible with most electronic drum pads, cymbals, triggers, and controllers
- › Premium instrument library multi-sampled from real drums and cymbals
- › Dynamic Articulation™ changes sounds' character along with dynamics for realism
- › Load sound sets and control software drum modules via USB
- › Play along with tracks and record yourself with the sequencer
- › Mix input for practicing with CD and MP3 players
